In tonight's course lecture on fractalU.com, Dan will talk about what he learned from this experience (clair-audience) during these and other passages into the afterlife, such as with our musician friend Eric Berglund from Mount Shasta, or recently at the fresh announcement of the "departure" of Jean-Noël Malaurie, friend of the peoples of the Far North, his famous his book "The Last Kings of Thule » (« Les derniers rois de Thulé »), from his Terre Humaine collection, published by Plon, heroic figure for many, including my family (of whom he was a friend).

(above) *The famous 'EM' drive (electro-gravitic propulsion) makes gravity because the microwave trapezoid conjugates/ implodes the frequency cascade at the focal point. At this wave conjugation point, the compression produces directional, longitudinal emf (which is gravity). It needs to be tuned- accurately by my Golden ratio x planck equation to optimize.*

(ci-dessus) Le fameux moteur EM (*propulsion électro-gravitique*) produit de la gravité parce que le trapèze à micro-ondes *conjugue* et *implose* la cascade de fréquences au point focal. À ce point *de conjugaison des ondes*, la compression produit un champ électromagnétique (CEM) directionnel et longitudinal (qui est la gravité). Le moteur EM (*électro-gravitique*) doit être réglé - avec précision par mon équation du ratio d'or x Planck, afin de l'optimiser.

The Emerald Tablets – A 38,000 Year Old Alchemist's Guidebook Shrouded in Mystery.

Even a little bit of research into the mysterious text we call the “Emerald Tablets” will quickly leave you baffled. While the translations reveal ancient secrets once known only by Hermetic Magicians, Alchemists and other Initiates, the origins of this work are not so clear at all.

projectyourself.com/blogs/news/the-emerald-tablets-a-38-000-year-old-chemist-s-guidebook-shrouded-in-mystery

Conflicting information, confusing speculation and heated opinion surround the Emerald Tablets text. In fact, depending on what you read or who you trust, this body of work is a mere 1,200 years old ... or a whopping 38,000!

The Tablets have been described as rectangular green slabs or plaques with exquisite, bas-relief lettering. A lettering which appears similar to the ancient Phoenician script. And while the many translations over the centuries all source their origin from these carved emerald stones, the “original” objects are nowhere to be found ... at least not to this day.

If there *is* a set of emerald stones carved with alchemical secrets, where might they be? Some say they're buried

the essential secret wisdom of Tehuti. If we remember the tale of Khufu and the Djedi, this secret wisdom of Tehuti lay hidden within the Great Pyramid. Whatever the possible antiquity of the information, the earliest text dates from the eighth century AD. Jabbir ibn Hayyan, the "Gerber" of the medieval Scholastics, produced an Arabic version from an unknown Greek original; probably from the 2nd century Hermetic renaissance, and contemporaneous with the "Kore Kosmica" and "The Divine Pyramander."

The following version is my own, using several different Latin texts and with reference to Jabbir for clarification of certain obscurities. I have not adhered to a strict literality, but tried to make the information speak for itself.

- 1) Truth: (certain and truly without doubt) That which is Below is like that which is Above, and what is Above is like what is Below, in order that there might be the miracle of Unity.
- 2) Just as all things proceed from Unity by the mediation of Unity, so also is the Universe created from unity by adaptation and combination.
- 3) Its father is the sun and its mother the moon. The wind has borne it in its body. Its nurse is the Earth.
- 4) It is the father of every miraculous work in creation.
- 5) Its power is perfect if it is converted into earth.
- 6) Separate the earth from the fire, the subtle from the gross, softly and with great care.
- 7) It rises from the earth to the heavens, and comes down again from heaven to earth, and thus acquires the power of the realities above and the realities below. In this way you will acquire the glory of the whole world, and all darkness will leave you.
- 8) This is the force of all forces; it conquers everything subtle and penetrates every thing solid.
- 9) Thus is the microcosmos created according to the prototype of the macrocosmos.
- 10) From this, and in this way, marvelous applications are made.
- 11) For this reason I am called Hermes Trismegistos, for I possess the three parts of wisdom of the whole world.
- 12) Perfect is what I have said of the work of the (golden) sun.

Interpretations of these twelve simple verses have occupied thinkers from Albertus Magnus to Issac Newton. Here, we have only space enough to note the holographic and fractal nature of the concepts. This ancient wisdom fragment holds many keys to a unified field of knowledge. As such, it was accepted as the corner stone of alchemy, the original attempt to unify matter and spirit, science and mysticism.

Daniel Winter might best be described as a Gnostic philosopher. I can see him holding his own with Dee and Agrippa, Valentinus and Apollonius. It is Dan's experience of gnosis that informs his understanding, and this makes him somewhat unique among scientists. Dan stands squarely in the tradition of the medieval alchemists who refused to separate out mind from matter, meaning from experience.

The alchemists preserved portions of an ancient wisdom, a form of gnosis that was old when the pyramids were built. The ancient Egyptians personified this wisdom as the Neter, or force, known as Tehuti, or Thoth to the Greeks.

The best statement of general alchemical principles is attributed to Hermes Trismegistos, or Hermes the Thrice Great; possibly a real person, perhaps even the great Imhotep, but just as likely a description of

But what if our modern understanding of physics allowed us to re-do Hermes' Tablet? What if we could describe, in a few simple statements, the essence of the unified field of matter/spirit/mind?

In one of Dan Winter's lectures, at the "Love's Light is Awakening" conference in Geneseo, NY, August, 1987, he presented a series of ten statements that can be taken as a new form of Hermes' Emerald Tablet.

1. The universe is made of one substance.

The compressibility of this universal medium stores form and memory in wave shape. Einstein's famous equation $E=MC^2$ shows that energy and mass are the same thing, in different forms.

2. The universe has one wave shape, the sine wave.

This principle of frequency signatures called "Fourier" means that even the most complex shape is a simple sum of sine waves of different lengths.

3. The universe can be described as a geometry of pressure.

Geometry produces symmetry, which allows waves proceeding from opposite directions to meet each other and stand (to phase and phase-lock.) Standing waves give the illusion of stability, segregation of momentum, and make possible the birth of matter. Pressure occurs where waves meet.

Ratio is sacred; scale is profane. If the geometry of replication is embraced in a seed of any scale, it is ratio that has the power. Size is unimportant where information is concerned, since information can travel to any scale via the wave guide, and be manifested. The universe is a hologram; even the tiniest part contains information about the whole.

4. Focus is the only medium that creates, in a universe made of waves.

Focus creates a pathway, or gravity, for waves to meet.

According to the "Attractor" theory in mathematics, focus converges the harmonics (waves which fit into each other) into nests which stand, called matter.

5. Shape is the only thing the universe has to conserve. Naming, and memory, ring out only from differences in shape, not substance.

6. The only way to conserve shape along a path is to maintain the ratio of length, area and volume (a nest of ratios.)

7. The best pathway to maintain a nest of ratios is the golden mean (Phi). Phi squared and Phi cubed are represented by the ratcheted dodecahedron. This pathway enables information (shape) to be moved

without loss of momentum (mind). The closer a material comes to forming this shape and path, the greater its conductivity. Think of superconductivity that is super-coherence of resonance or wave shape.

8. Coherence at any level is coherence at every level. An orderly relation between wave lengths establishes a connection between frequencies and fields, which cannot persist unless it resonates to ALL frequencies and fields. This harmonic cascade (Jacob's Ladder) establishes the connectedness called holography, and also ecstasy.

9. DNA is a four-dimensional dodecahedron, in the sense that adding one spin to three dimensions adds a harmonic and a nest for memory. (The pressure envelopes of the little bubbles of light which make up the matter of the gene are enfolded or enveloped with another harmonic, with each successive axis of spin, or symmetry.) The DNA double-helix keeps a set of wavelengths evenly spaced on a path through time and space, thus conserving the wave shape.

10. Light, when folded back on itself, comes to know itself. The spiral-within-a-spiral-within-a-spiral creates genetic material at all levels. Light causes an extra axis of spin, which superimposes a harmonic of frequencies upon a nest of frequencies in an envelope of pressure we call light as matter. This creates extra mind, because the universal mind meets itself at every wave intersection. So the denser the intersections, or nodes, the greater the self-knowingness, or sense of identity. (See Arthur Young's book, Reflexive Universe.) Thus identity in the cell (immunity) and coherence are the same thing, metabolically and emotionally.

This new Emerald Tablet contains the keys to a vast new synthesis of science and spirituality. It also contains the keys to understanding the book you are about to read.

This book has been collected from over ten years worth of Dan's articles, letters and reports. Most of it has appeared through the years in Dan's periodical publications starting with "One Crystal's Dance," and on through the Planet HeArtWorks papers and multiple editions of Alphabet of the Heart.

My goal in editing this book has been to present Dan's ideas in a clear and understandable way. Think of it as a hologram enfolded and flattened down into a literary structure. Each section stands alone, is self-contained, and is also referenced to the whole concept. Each part contains the whole image.

Start anywhere you like. Read forward, backward, or just look at the pictures for a while. Then read it all the way through, in one flow, and let your mind resonate to this truly heroic quest: in search of the role of mind in a universe of waves.

Les Pyramide, quarry at Glanum, St. Remy-de-Provence

Sextus suggests the six pointed star of Solomon, commonly called now the Star of David, but a perennial symbol of Judaism. And Man and sol, man of the sun, and even sol(o)man, Solomon. Man of the Son/Sun also suggests early Christianity and even Mithraism and Sol Invictus, two close competitors with Christianity in the second and third centuries. So Nostradamus is implying that some very important relic, perhaps a tombstone, connected to a Jewish messianic cult figure who was the Mansol, Solomon, savior, etc. is hidden in the goat caves of the ancient quarry near Glanum.

Nostradamus hid these clues in his massive *Prophecies*, combining them with other connections and clues to events that are some how involved in the “prophecy’s” fulfilment. But we can be fairly sure that Nostradamus intended these key phrases and images to stand out. Think of it as the bait...

Right Portal of St. Trophime, Arles

At the height of their power and influence, the Lords of Les Baux ruled roughly one hundred villages and hilltop keeps on both sides of the Alpilles and by the late twelfth century had taken on a role in international power politics. Their support encouraged Frederick I Barbarossa in his end-run around the Roman church, resulting in his 1179 coronation as King of Arles. The facade of St. Trophime in Arles, designed and sculpted for the occasion, has a frieze depicting the entire story of the Magi as a direct nod to the influence of the Lords of les Baux. It was also the time of the Troubadours, who sang at the courts of love held in Les Baux, Romanin

This project relates to an experiment that was originally done in 1927, in a Poland lab. It involved the piezo/electromagnetic overloading of a quartz crystal, and the subsequent increase of volume and changes on a molecular and quantum level. The original experiment indicated that the lift to weight ratio was approximately 800:1, with a 90 watts per pound, or 198.45 watts per kg, power expenditure. Subsequent analysis of the data indicated that the power expenditure was related to input frequency, with the two being inversely proportional to one another.

The original experiment was performed using 2000 watts at 770 KHz, essentially an AM radio transmitter beamed into the crystal. The crystal was first conditioned by placing it in a chamber with an asymmetric pump wave that expanded and reformed

Physics: Lithium Niobate phase conjugate dielectric

The original experiment was performed using 2000 watts at 770 KHz, essentially an AM radio transmitter beamed into the crystal. The crystal was first conditioned by placing it in a chamber with an asymmetric pump wave that expanded and reformed the crystal lattice, evidently forming a new one at a higher quantum state. The crystal lost its transparency, going from clear to opaque white while increasing its size to 20 times its former length on each side, with a volumetric increase of a factor of 4000:1. It was after this volumetric increase that the crystal was subjected to pumping by electromagnetic means to generate the lift.

A research associate, who will remain unnamed for security reasons, recreated this first stage of the experiment to expand the crystal, and noted that it radiated a field that felt tangible for a radius of 2 meters around the device. It had the aspects of an electrostatic field, but did not show up on a surface electrometer or a remote EMF field meter. According to him, there was a weight discrepancy between inside and outside the field, possibly due to an unknown electrogravitic effect.

(MARCEL VOGEL) QUARTZ CRYSTAL HEALING: the crystal is pure HEX symmetry- so the piezo field generated will NEVER be conjugate or implosive- or centripetal- to output the critical Longitudinal/healing compressional EMF - UNLESS - it is driven by an EXTERNAL phase conjugate pump (pressure) wave in this case that MUST come from the BODY (feeling Bliss!) who HOLDS IT

Dan Winter's new equation proving the phase conjugate

Solar year = Planck time x Golden Ratio ^241.01 (1.35125 x 10^-43) x (1.618 ^241.01) = 1 yr
Venus Year = Planck time x Golden Ratio ^240 (224.701 Earth days / Solar Year 365.242 = .6152 (~ Golden Ratio)

(note to Elena: HOW floating platforms worked in clouds of Saturn / Jupiter)

The famous V. S. Grebennikov flying / floating platform - was simply packed with anti-gravity flying insect skeletons- whose “cavity structure effect” created implosive capacitance in concave foam bubble cavities superdielectric - which aided insect flight after millions of years of evolution. Important also the phonon (sonic) HUM of the insect wings beating serving as a piezo driving ‘phase conjugate pump wave’.

Célèbre plate-forme volante / flottante de V. S. Grebennikov remplie tout simplement de squelettes d'insectes volants, anti-gravité, dont l’*“effet de structure de cavité”* crée une capacité *superdiélectriques* implosive dans des microcavités concaves, ce qui facilite le vol des insectes, après des millions d'années d'évolution. Important également *le phonon (sonique) HUM* du battement d'ailes des insectes servant d'onde de pompe piézo à phase conjuguée.

What does **WARP** propulsion mean (*Star-Trek, ex: Kowsky Frost*)?

The classic image conventional physics uses to describe wormhole is misleading- they say 'entanglement' creates Einstein-Rosenbridge'/wormhole...

In fact golden ratio phase conjugation (perfect nesting) IS the perfection of entanglement... The resulting coherent longitudinal emf plasma projection -includes golden ratio superluminal cascades-

(The 'fractal attractor') creating 'action at a distance' down the vortex... ***Time space is NOT 'warped' or bent, it is a gradient of acceleration (DW)*** - the charge paths are connected faster than light DUE to conjugate implosion. That fractal phase conjugate implosion also meaningfully describes the cause of gravity- AND connects the longitudinal ARRAY - mechanism of path thru lightspeed.. (how wormholes work).

Describing space-time as somehow 'bent' is not specific

Dan Winter - fractalfield.com

It is the lines of charge compression which implode and thus fractally attract.. causing the acceleration of charge toward symmetry center.. named.. 'the gravity'

The seeming 'action at a distance' of black holes/stargates/portals - is the result of golden ratio fractal - multiples of light speed (ref Chiao) nested- due to conjugate created coherent longitudinal emf interferometry.. (which Bearden proved is the stuff of gravity waves)

Note July 2023- we added much more detail/graphics - to this PYRAMIDS as PHASE CONJUGATE PUMP WAVE - GRAVITY DIODE effect at flameinmind.com/lifeforce/pyramidgravitydiode.html

(excerpt) How Pyramids Work Electrically: Global Wireless Power, Gravity Diode, Rejuvenation Effect

How Does the Pyramid Function as a "GRAVITY DIODE"?

WHEN the pyramids are correctly tuned - to the Planck- golden ratio - PHASE CONJUGATE PUMP WAVE- (compelling evidence below) which IS The Schuman harmonic cascade (making it the piezoelectric 'HUMMER')

THEN - that specific planck implosive frequency cascade- DRIVES the less directional TRANSVERSE - EMF Harmonics- DOWN the Caduceus cascade- emerging from the pine cone squirt gun NOZZLE - which is PLANCK- (image below) specifically then emerging as/ redirecting (making the EL) - into directional coherent LONGITUDINAL EMF- which IS what gravity waves (ref Bearden et al) - AND global wireless power - are MADE OF!

GLOBAL WIRELESS POWER: The NODES / compressional still points- of that LONGITUDINAL EMF ARRAY (SACRED SITES)- form the dodec/ icos Earth GRID - which the longitudinal emf inertia can be tapped or added- using frequency matching (capacitive coupling). At those magnetic line geobiology cross points- it has been proven- is where measureable telepathy (dream track/ song line) is far more available, - per Korotkov, Kozyrev where nuclear critical mass is measureably reduced (by compression) - per Bruce Cathie

Que signifie la propulsion **WARP** (Star-Trek, ex : Kowsky Frost) ? L'image classique utilisée par la physique conventionnelle pour décrire les vortex est trompeuse, elle dit que l'*intrication*/ l'*enchevêtrement* crée le trou de ver d'Einstein-Rosenbridge...

En fait, la conjugaison de phase au ratio d'or (*nidification* parfaite) EST la perfection de l'*enchevêtrement*... La projection cohérente de plasma *cem* longitudinal qui en résulte comprend des cascades supraluminiques au ratio d'or - (L' "*attracteur fractal*") créant une "action à distance" à travers le vortex... L'espace-temps n'est PAS (*warped*) plié, il s'agit d'un gradient d'accélération (*DW*). Les chemins de charge sont connectés plus vite que la lumière EN RAISON de l'implosion conjuguée. Cette implosion fractale à phase conjuguée décrit également de manière significative la cause de la gravité - ET connecte au réseau (ARRAY) longitudinal - mécanisme de dépassement de la vitesse de la lumière (fonction des trous de ver).

Décrire l'espace-temps comme étant en quelque sorte "plié" n'est pas assez précis...

Dan Winter - fractalfield.com

Ce sont les lignes de compression de charge qui implosent et donc s'attirent fractalement... causant l'accélération de la charge vers le centre de symétrie... nommé... "**La Gravité**"

L'apparente "action à distance" des trous noirs/ portes stellaires / portails - est le résultat (de la fractalité/ *gigognes*) du ratio d'or x par la vitesse de la lumière (réf. Chiao) en raison de l'interférométrie des champs EM longitudinaux cohérents créés de manière conjuguée (dont Bearden a prouvé qu'ils étaient à l'origine des ondes gravitationnelles).
